

# Brain and Memory Health

## Alzheimer's Disease is a crippling national epidemic:

- Alzheimer's is the 6th leading cause of death in the U.S.
- One in 3 seniors dies with Alzheimer's or another type of dementia.
- Over 13 million baby boomers will develop Alzheimer's and other types of dementia by 2050.

Neuropsychological Testing  
Associate and Patient Care  
Educator

**April Jerup, CRMA**  
Medical Assistant

Few people are prepared for the devastating and life-changing impacts of Alzheimer's and other types of dementia. St. John's Cognitive Health provides assessment, treatment, and an integrated continuum of care plan for those suffering from memory impairments.

### Services offered:

- Screening, memory assessment, and neuropsychological testing
- Patient and family counseling and education
- Coordination with physical, speech, and occupational therapists, as well as registered dietitians
- Referrals to the University of Utah Center for Alzheimer's Care, Imaging and Research
- Coordination of care with primary care providers
- For a limited time, free memory and cognitive health evaluations for United States Veterans
